

## Zhen Ding Technology Holding Limited (4958 TT)

### October 2022 Monthly Revenue Report

Zhen Ding Technology Holding Limited (Ticker: 4958), a leading global PCB manufacturer, today reported October 2022 revenue of NT\$21,190 million, up 29.86% YoY and up 4.53% MoM. For January through October 2022, cumulative revenue reached NT\$139,644 million, up 21.54% YoY. According to Zhen Ding, driven by customer pull-ins for new products in a traditionally stronger season, October revenue reached a record high for a single month in company's history. In addition, not only does its product mix continue to shift to higher end products, but its operating efficiency of four product lines all improved materially under the One ZDT strategy. While the global macro-economic outlook is still highly uncertain, Zhen Ding will continue to execute its growth strategy. Under the One ZDT strategy, the company will leverage its four product lines, namely FPC, IC substrate, HDI and multi-layer RPCB to penetrate fast-growing application markets, further strengthening its leading position in the PCB industry.
