

Zhen Ding Technology Holding Limited (4958 TT)

May 2024 Monthly Revenue Report

Zhen Ding Technology Holding Limited (Ticker: 4958), a global leading PCB manufacturer, today reported May 2024 revenue of NT\$10,639 million, up 28.6% YoY, reaching the second highest for the same period in the company's history. For January through May 2024, cumulative revenue reached NT\$54,207 million, up 15.4% YoY.

According to Zhen Ding, its May revenue has continued to deliver a significant YoY increase. All four major product applications, including Mobile Communication, Computers and Consumer Electronics, Automotive/Server/Base Station and IC Substrate, each reached double-digit YoY growth. For the first five months of the year, revenue for IC substrate delivered the highest growth, which has doubled compared to the same period last year, in line with the company's previous expectation.

Looking at the full year of 2024, Zhen Ding pointed out that the second quarter remains the traditional off-season. As the industry enters the traditional peak season in the third quarter, Zhen Ding expects that the demand from customers' new products as well as the increasing revenue contribution from IC substrate, server, and automotive products will drive the company's performance in the second half of the year.

Unit: thousands	Consolidated Revenue (NTD)
May 2024	10,639,324
May 2023	8,270,851
YoY Change (%)	28.6%
Jan – May, 2024	54,207,037
Jan – May, 2023	46,955,515
YoY Change (%)	15.4%

* The consolidated revenue for each month mentioned above is the amount that the Company announces and files with the Taiwan Stock Exchange on a monthly basis. The final consolidated revenue is subject to the financial report reviewed by CPAs. For further details, please visit "[Investors](#)" section on the company website.

About Zhen Ding Technology Holding Limited

Zhen Ding Technology Holding Limited (Taiwan Stock Exchange Ticker: 4958) is engaged in the research, development, production and sales of a wide range of flexible printed circuit boards (FPC) and modules, high-density interconnect (HDI) PCBs, substrate-like PCBs (SLP), Mini LED ultra-thin boards, IC substrate and multi-layer rigid printed circuit boards (RPCB) for a wide range of applications including computer information, consumer electronics, networking, automotive electronics, high-performance computing and medical fields. We provide one-stop shopping for all-round solutions to our customers. For more information, please visit the Company's website: www.zdtco.com.
