

## Zhen Ding Technology Holding Limited (4958 TT)

### January 2025 Monthly Revenue Report

Zhen Ding Technology Holding Limited (Ticker: 4958), a global leading PCB manufacturer, today reported January 2025 revenue of NT\$13,469 million, up 5.44% YoY, achieving a record high for the same period in the company's history. According to Zhen Ding, while the first quarter is traditionally a slower season, its January revenue still delivered YoY growth, primarily driven by the double-digit YoY growth in Computers and Consumer Electronics, Automotive/Server/Base Station, and IC Substrates.

Zhen Ding pointed out that while macroeconomic uncertainties have increased this year, the wave of edge AI devices—including AI smartphones, AI PCs, intelligent vehicles, and AIoT—will gradually drive PCB spec upgrades and content growth. Additionally, AI servers and IC substrates are also expected to maintain growth this year. With new capacities in Thailand and Kaohsiung gradually coming online starting this year, Zhen Ding's diversified production bases will better meet customer needs. Overall, the company is expected to deliver another solid performance in 2025.

| Unit: thousands     | Consolidated Revenue (NTD) |
|---------------------|----------------------------|
| <b>January 2025</b> | <b>13,469,283</b>          |
| <b>January 2024</b> | <b>12,774,631</b>          |
| YoY Change (%)      | 5.44%                      |

\* The consolidated revenue for each month mentioned above is the amount that the Company announces and files with the Taiwan Stock Exchange on a monthly basis. The final consolidated revenue is subject to the financial report reviewed by CPAs. For further details, please visit "[Investors](#)" section on the company website.

#### About Zhen Ding Technology Holding Limited

Zhen Ding Technology Holding Limited (Taiwan Stock Exchange: 4958) specializes in the research, development, production, and sales variety of products, including flexible printed circuit board (FPC) and surface mount assembly (SMA), substrate-like PCBs (SLP), high-density interconnect (HDI) PCBs, ultra-thin Mini LED board, multilayer rigid printed circuit boards (RPCB) and IC substrates (ICS). These products are widely used in end products such as computer information, consumer electronics, communications networks, automotive electronics, AI server high-speed computing, optical module and medical applications. The company offers professional one-stop shopping, full-solution services to customer worldwide.
