

## Zen Ding Holding and Topoint Technology Sign Strategic Cooperation Agreement Joining Forces to Advance High-End PCB Drilling Technologies

**Shenzhen, China – December 1, 2025** – Zhen Ding Tech. Group (TWSE: 4958), the world's largest PCB manufacturer, and Topoint Technology Co., Ltd. (TWSE: 8021), a global leader in precision drill bits and integrated drilling solutions, officially signed a strategic cooperation agreement today at the Zen Ding Times Building in Shenzhen. The ceremony was jointly attended by **Mr. Charles Shen, Chairman of Zen Ding**, and **Mr. Lin Hsu-Ting, Chairman of Topoint Technology**, along with senior executives from both companies who witnessed this important milestone.

Under this agreement, the two parties will establish a comprehensive strategic partnership focused on **advanced PCB drilling technologies, micro drill bit development, AI server applications, and next-generation substrate technologies**. The collaboration aims to accelerate innovation, strengthen production capabilities, and expand market presence in high-end electronics applications.

Topoint Technology has long specialized in precision PCB drill bits and drilling process solutions, with strong R&D and manufacturing capabilities. The company has deep technical expertise in AI

servers, ABF substrates, high-speed networking, HDI boards, and other advanced PCB applications. Through this partnership, Topoint will collaborate closely with Zen Ding to jointly develop **high-efficiency, high-reliability advanced drilling processes**, driving deeper cooperation in the high-end electronics industry.

As a global leader in the PCB industry, Zen Ding continues to invest heavily in advanced substrates and AI-related applications. By combining Zen Ding's expertise in PCB design and manufacturing with Topoint's strengths in precision drilling and tooling technologies, the partnership will further optimize supply chain synergy, enhance manufacturing competitiveness, and accelerate the development of smart production and sustainability initiatives.

**Charles Shen, Chairman of Zen Ding** said:

"Topoint Technology possesses world-class innovation and technical capability in precision and high-performance drill bit development. We place great value on this partnership and look forward to deep collaborations in AI servers, advanced substrates, and high-speed communication applications, jointly driving industrial upgrades and technological breakthroughs."

**Lin Hsu-Ting, Chairman of Topoint Technology** said:

"Zen Ding is a global leader in the PCB industry and has played a crucial role in driving technological and manufacturing innovation. Topoint is honored to become a strategic partner of Zen Ding. Moving forward, we will combine our strengths in products, processes, and equipment to jointly develop high-efficiency, high-quality precision drilling solutions, injecting new momentum into the sustainable development of the electronics industry."

Looking ahead, Zen Ding and Topoint will continue to deepen cooperation across **new product development, supply chain integration strategies, AI-driven smart manufacturing, and sustainability**, jointly advancing the PCB industry toward higher precision, higher efficiency, and greater value creation.

### About Zhen Ding Technology Holding Limited (ZDT)

Zhen Ding Technology Holding Limited (TWSE: 4958) specializes in the R&D, production, and sales of flexible printed circuit boards and modules, substrates, high-density interconnect (HDI) boards, multilayer and high-density PCBs (HLC-HDI), multilayer rigid PCBs, IC substrates, and other advanced electronic circuit products. These products are widely used in computer and information equipment, consumer electronics, communications, automotive electronics, AI servers, optical modules, and medical devices. According to Prismark's global PCB revenue ranking, ZDT has been the world's largest PCB manufacturer for eight consecutive years from 2017 to 2024.

### About Topoint Technology Co., Ltd.

Topoint Technology Co., Ltd. (TWSE: 8021), founded in 1996, is a global leader in the development, manufacturing, and sales of precision micro drill bits, while also providing advanced drilling process integration services for the PCB industry. Leveraging core strengths in materials science, precision manufacturing, and surface coating technologies, Topoint offers a comprehensive portfolio of drill bits, routing tools, mechanical drilling, and laser drilling services. Its solutions support a wide range of advanced PCB applications, including IC substrates, HDI, RPCB, FPC, ABF, HLC, and other high-end circuit board technologies. Topoint is dedicated to delivering high-quality, high-efficiency, and high-reliability solutions that enhance customers' production output and yield performance. With operations across China, Taiwan, and Southeast Asia, Topoint continues to grow its global service network. Driven by innovation and sustainability, the company strives to become a trusted world-class partner in the field of precision PCB processing.
