

Zhen Ding Subsidiary Leading Awarded the 23rd "Shenzhen Top Brands" Title

Zhen Ding Technology Holding Limited (Ticker: 4958), a global leading PCB manufacturer, today announced its subsidiary, Leading Interconnect Semiconductor Technology Co.,Ltd has been awarded the prestigious title of "23rd Shenzhen (Bay Area) Top Brands", recognizing its technological strength and forward-looking strategy in the high-end IC substrate sector.

This award not only recognizes Leading's contributions to advanced semiconductor packaging but also marks a significant milestone for Zhen Ding as it solidifies its presence in a critical segment of the semiconductor industry.

As a crucial part of Zhen Ding's implementation of the "One ZDT" strategy, Leading focuses on the R&D and manufacturing of high-end IC substrates for AI data centers, autonomous driving applications and consumer electronics. The company accurately caters to the next-generation advanced packaging needs and is dedicated to developing high-end IC substrates with high-layer count, large size and fine circuit to address the surging market demands brought by the rapid development of AI and high-performance computing(HPC).

Zhen Ding stated that this distinction awarded to Leading validates the Group's long-term commitment to the semiconductor substrate sector, demonstrating full alignment with national industrial policies and the direction of technological advancement. In the future, Zhen Ding will continue to support Leading in consolidating its technological moat and collaborate with global partners to drive innovation in the semiconductor industry.

About Zhen Ding Technology Holding Limited

Zhen Ding Technology Holding Limited (Taiwan Stock Exchange: 4958) specializes in the research, development, production, and sales of a diversified range of products, including flexible printed circuit board (FPC) and surface mount assembly (SMA), substrate-like PCBs (SLP), high-density interconnect (HDI) PCBs, high-layer-count and high-density (HLC-HDI) boards, multilayer rigid printed circuit boards (RPCB) and IC substrates (ICS). These products are widely used in end products such as computer information, consumer electronics, communications networks, automotive electronics, AI server high-speed computing, optical module and medical applications. The company offers professional one-stop shopping, full-solution services to customer worldwide. According to Prisma's global PCB industry rankings by revenue, Zhen Ding has been ranked the world's largest PCB manufacturer for eight consecutive years, from 2017 to 2024.
